3. Since I become an actor. I always wanna be a director and scriptwriter. Cause I want to tell my own stories. So everytime when I work withe different directors, team, I always try to learn the way how they works. It helps me to be a good actor to know the characters very well, and also helps me to write my own stories. So this time, when I wrote scripts for this new movie. I feel all the work I've done before, the stories, the character. all helps me to understand what is real good story, and what kind of character can be loved by audience
